Period for Reply -- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

Claim Objections

Claim 3 is objected to under 37 CFR 1.75 as being a substantial duplicate of claim 1. When two claims in an application are duplicates or else are so close in content that they both cover the same thing, despite a slight difference in wording, it is proper after allowing one claim to object to the other as being a substantial duplicate of the allowed claim. See MPEP § 706.03(k).

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 2 and 9 are rejected under 35 U.S.C. 102(b) as being anticipated by Koyanagi et al. (US-20030161979). Regarding Claim 9, Koyanagi et al. disclose an overend take-off crosswound bobbin 21 having at least one thread wound on with a variable pitch angle (see Figure 8) characterized in that the pitch angle of the thread layers situated to the inside is on average, as seen over a number of thread layers smaller than that of the thread layers situated further to the outside (see line c of Figure 8) (Figures 1-8).

Regarding Claim 2, Koyanadi et al. disclose a method for producing an overend take-off crosswound bobbin 21, in which at least one thread is wound on with a pitch angle (see Figure 8) which is capable of being varied during the winding operation, characterized in that the pitch angle increases on average, as seen over a number of thread layers, with increasing bobbin diameter (see line c of Figure 8) (Figures 1-8).

Allowable Subject Matter

Claims 1, 4-7, and 10-15 are allowed.

Response to Arguments

With respect to Applicant's arguments starting on page 8, line 23 to page 9, line 25, Applicant argues Koyanagi et al. does not disclose or suggest, "at least one thread is wound in crosswindings at varying traversing strokes...and...one or more...crosswound layers...having parallel windings start at a distance from one edge...and end at a distance before the other edge...". Applicant's arguments have been fully considered but they are not persuasive. Applicant's arguments are not commensurate with the claims, as claims 2 and 9 are independent claims and do not require crosswindings at vary traversing strokes or any parallel windings. Therefore, absent any other arguments, the rejection of Claims 2 and 9 are maintained.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
